Online Forums can be scary!

Here's how you can approach them:

- Search for existing posts/discussions.
- Be specific about what you're asking.
- Create a reproducible example.
- Ignore the bullies (and don't be one)!

Search for existing posts/discussions.

Most likely, there are other people on the internet with the same question.

Hi, am beginner in R. Trying to solve this but ...
Error in as.data.frame.default(month_data) :
cannot coerce class 'c("datatables", "htmlwidget")' to a data.frame

Hi @smriti_j, welcome to RStudio Community.

It's hard to offer you specific help by just looking at an error message. It would be ideal if you could provide a **reproducible example** (reprex). Please read this guide to see how to create one:

<https://community.rstudio.com/t/how-to-convert-datatable-into-data-frame-for-plot-in-ggplot2/59165>

Create a reproducible example.

Reproducible examples enable others to troubleshoot.

Stack Overflow Isn't Very Welcoming. It's Time for That to Change.

We <3 and believe in Stack Overflow. But sometimes, loving something means caring enough to admit that it has a problem. Let's start with the painful truth: Too many people experience Stack Overflow¹ as a hostile or elitist place, especially newer coders, women, people of color, and others in marginalized groups. Our employees and community...
